

KAWAI

DIGITAL PIANO
KDP120

AN EXCELLENT INTRODUCTION TO KAWAI DIGITAL PIANO QUALITY

Kawai has been crafting musical instruments for over 90 years, maintaining traditional processes while embracing the latest technical innovations. These decades of experience allow our engineers to create superb digital instruments that bring musical enjoyment to players of all levels.

The KDP120 digital piano is the latest addition to Kawai's highly-respected range of award-winning home instruments, combining an extremely authentic weighted-key keyboard action and realistic grand piano sounds within an attractive, yet highly affordable package.

Featuring 88 grade-weighted keys, the KDP120 keyboard responds like a real acoustic action, while its rich concert grand piano sounds are guaranteed to inspire and impress. The instrument also features Bluetooth® connectivity, built-in lesson pieces, and a convenient song recorder, making the KDP120 an ideal choice for beginners seeking a starter instrument, or more experienced players looking for a second piano for silent practise with headphones.

The new KDP120 – an excellent introduction to Kawai digital piano quality at an attractive price.

Realistic grand piano sounds

The KDP120 digital piano captures the beautiful sound of the highly-acclaimed Shigeru Kawai *SK-EX* concert grand piano. All 88 keys of this exceptional instrument have been meticulously recorded, analysed, and faithfully reproduced using proprietary *Harmonic Imaging* technology, to deliver a rich and expressive playing experience.

Authentic keyboard action

The KDP120's *Responsive Hammer Compact II* (RHCII) keyboard action has been developed to reproduce the distinctive touch of an acoustic grand piano. Its springless key mechanism, sturdy construction, and accurate hammer sensing system delivers a smooth, natural, and highly authentic piano playing experience.

In addition to grade-weighted hammers, the RHCII keyboard action also features Kawai's latest triple-sensor key detection system for enhanced playing realism. This additional third sensor improves responsiveness when striking the same keys repeatedly, allowing trills to sound smoother and more acoustic piano-like when played.

Integrated Bluetooth® connectivity

The KDP120's integrated Bluetooth MIDI technology allows the digital piano to communicate with supported smart devices wirelessly. Once paired with a phone or tablet, players can control the instrument using Kawai's *PianoRemote* app, or expand its functionality with a wide range of other education, performance, and scoring apps.
